

CORRIGENDA

Infection prevention and control health-care facility response for COVID-19: A module from the suite of health service capacity assessments in the context of the COVID-19 pandemic: Interim guidance, 20 October 2020

(WHO/2019-nCoV/HCF_assessment/IPC/2020.1)

Page iii, line 15 (Contents)

Delete: Annex 1. Harmonized health service capacity assessments in the context of the COVID-19 pandemic25

Insert: Annex 1. Suite of health service capacity assessments in the context of the COVID-19 pandemic25

Page 1, lines 14–20

Delete: In response to this situation WHO has developed the “Infection prevention and control health-care facility response for COVID-19” monitoring tool. This tool has been designed to assess infection prevention and control capacities to respond to COVID-19 in health facilities. This tool forms part of a wider suite of health service capacity assessment tools, the [Harmonized health service capacity assessments in the context of the COVID-19 pandemic](#). These different monitoring tools focus on different aspects of the dual-track of maintaining essential health services while continuing to manage COVID-19 cases. The suite and the different modules are described in annex 1.

Delete: In response to this situation, the [Harmonized health service capacity assessments in the context of the COVID-19 pandemic](#) is a suite of health service capacity assessment tools that has been developed to support rapid and accurate assessments of the current, surge and future capacities of health facilities throughout the different phases of the COVID-19 pandemic (*I*). The suite consists of two sets of modules that can be used to inform the prioritization of actions and decision-making at health facility, subnational and national levels:
